Location:

EXPO Kraków
9 Galicyjska St.
31-586 Kraków

THEMATIC SCOPE

Packaging and components

Labels and printing

Eco

Technology

Design and advertising

Services

The 15th edition of Packaging Innovations International Packaging Fair will take place from the 20th to the 21st of September 2023 in Krakow at the International Exhibition and Convention Centre EXPO Kraków. It is to underline that Packaging Innovations focuses on a diversity of packaging products and services considering both the exhibitors' and visitors' profile.

DESIGN, SMART PACKAGING AND ECOLOGY

The fair's participants can expect two zones dedicated to stage presentations and lectures giving the opportunity of sharing sector experiences, presenting and discussing problems, solutions and innovations with a broader audience. This year's edition concentrates on the following areas: design, smart packaging, and ecology.

ACCOMPANYING EVENTS

Other accompanying events including the conferences co-organised with our partners represent a substantive supplement of the fair. It offers the opportunity of constant development and self-improvement to all participants, reflecting also an innovative approach to design, smart packaging and ecology.

STUDENT ZONE CONTEST

The students competing for the most innovative packaging design will present their projects at the exhibition zone. The record number of entries was noticed this year. The exhibitors of Packaging Innovations Fair will take part in choosing the winner of a special contest category.
